We provide complete solution from initial stage of dimensions, confirmation, design and manufacturing and up to the final stage of installation for all types of conventional as well as CNC machines in India.

M/S Nityam CNC Services provides end to end solution from design, manufacturing, installation and repairs / refurbishing services for the machine tool industry.

AMC

In today's era where every organization wants their machines to work on maximum efficiency with zero downtime throughout the Year, AMC plays vital role which ensures to minimize the machine downtime caused due to failures due to three main reasons. 1. Man Power problem 2. Machine Problem 3.Process problems. We provide solutions to solve all these issues and provide technical help at customer end.

Nityam CNC Services experienced technicians will visit to your work place as per AMC schedule. AMC will include opening, cleaning, lubricating guide ways and covers. On inspection if needed worn-out spares like wipers, guide shoes, rollers, spring etc. will be replaced and refitted. This scheduled preventive maintenance program on regular basis can definitely reduce the possibility of machine failures and unplanned downtime in your works.

Nityam CNC Services assures best support and attentions at all times, and look forward to have a long lasting business relationship with your organization.

We will send separate quotation for **Annual Maintenance Contract** after our first visit to your plant and after initial assessment of your machines.

Our standard **service charge** for attending CNC machines from 9AM to 5PM (charges to be discussed) are per day /machine/ engineer +taxes, lodging, boarding and transport charges extra.

We also provide SPECIAL **24 X 7 SERVICE** for attending CNC MACHINE (charges to be discussed) per day per machine +taxes.Lodging, boarding and transport charges extra.

Let us know your requirement on E-mail and we will come back to you with our proposal.

Thanks and Regards,
BHARAT CHOUDHARI
